

# Earth, Moon, and Sun

## Grade 3 Science Worksheet

atmosphere      Earth      frozen      satellite  
liquid      orbits      star      planets      rock  
Sun      gases      rotates      plasma      solar

The Earth is made mostly of \_\_\_\_\_. It has both liquid and \_\_\_\_\_ water on its surface. Earth is surrounded by an atmosphere of \_\_\_\_\_. The Earth \_\_\_\_\_, or spins, once every 24 hours.

The Moon is also made of rock. It does not have \_\_\_\_\_ water or an \_\_\_\_\_. The Moon is a \_\_\_\_\_ of Earth. It \_\_\_\_\_, or goes around, the Earth once about every 27 days.

The Moon rotates once every time it orbits around the \_\_\_\_\_. This means that from Earth we only ever see one side of the Moon.

The Earth and Moon system orbits around the \_\_\_\_\_.

The Sun is a \_\_\_\_\_. It is made of hot, glowing gases and \_\_\_\_\_. It is at the center of our \_\_\_\_\_ system. All of the \_\_\_\_\_ orbit around it.
